About Rajvarsh

Rajvarsh Industries Pvt. Ltd. is a Nagpur-based manufacturer, supplier, exporter and wholesaler of industrial packaging films. Since its incorporation in 2017, the company has focused on quality packaging products for protection, wrapping, storage, dispatch and safe transportation. The company offers packaging products such as stretch wrap film and air bubble film for industrial and commercial use. With an experienced team and quality-focused manufacturing practices, Rajvarsh Industries serves customers who require dependable packaging performance, customised specifications and responsive supply support.

Established in 2017

Manufacturer of industrial packaging films

Factory located at Butibori Industrial Area, Nagpur

Customised thickness, width and roll options

Focused on quality, reliability and customer service

VISION

To emerge as a leading company in polymer processing by building an efficient, reliable and internationally competitive business organisation that provides comprehensive packaging solutions to customers.

MISSION

To develop efficient and sustainable packaging-film solutions through fair business practices, technological expertise and long-term relationships with customers, associates, partners and employees.

◆ OUR VALUES

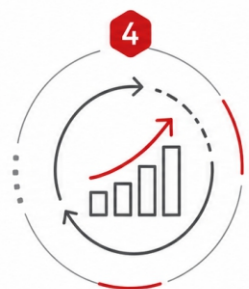

Quality First

Customer Commitment

Integrity & Trust

Continuous Improvement

Manufacturing & Quality

Rajvarsh manufactures stretch films using a 5-layer cast film process designed to deliver consistent thickness, clarity, cling, stretch performance and load stability.

- ◆ Consistent film thickness and width
- ◆ Customised sizes as per customer requirements
- ◆ Good clarity and stretch performance
- ◆ Suitable for industrial handling, storage and transit
- ◆ Reliable cling and puncture resistance
- ◆ Quality Assurance & Expertise

We operate with an experienced and qualified team of professionals, supported by quality management systems. Our technical knowledge and consistent efforts help ensure that every batch meets defined quality requirements before dispatch.

Sustainability Commitment

We focus on developing efficient and sustainable packaging solutions. Rajvarsh products are recyclable, helping customers protect their goods while supporting responsible environmental practices.

Stretch Film

Rajvarsh Stretch Film is an LLDPE-based packaging film used for securing, protecting and stabilising goods during storage and transportation. It is suitable for hand wrapping, semi-automatic wrapping and fully automatic wrapping applications. Stretch film works as a secondary packaging material for industries that need pallet stability, dust protection, moisture resistance, handling safety and better product presentation during dispatch.

- ◆ High stretch and cling properties
- ◆ Good product visibility and clarity
- ◆ Helps secure pallet loads
- ◆ Protects products from dust and handling damage
- ◆ Available in customised widths and thicknesses

PALLET LOAD STABILISATION

Manual Stretch Film

Manual Stretch Wrapping Film is designed for hand application and is suitable for wrapping boxes, cartons, pallets and irregular-shaped goods. It is commonly used in warehouses, factories, dispatch units and lower-volume packaging operations.

Processing Type	5-Layer Cast Line
Material Type	LLDPE
Thickness Range	9 to 60 Micron
Size Range	50 mm to 1500 mm
Core ID	1 inch / 25 mm and 3 inch / 76 mm
Elongation	200% to 250%
Packaging Type	Box with Stretch Wrap
Colour	Transparent

Machine Automatic Wrap

Machine Automatic Wrap Film is designed for use with stretch wrapping machines. It offers strength, puncture resistance, clarity, smooth unwind and consistent wrapping performance for high-volume packaging operations.

Processing Type	5-Layer Cast Line
Material Type	LLDPE / Metallocene
Thickness Range	18 to 51 Micron
Size Range	250 mm to 500 mm
Core ID	3 inch / 76 mm
Elongation	250% to 350%
Packaging Type	Box with Stretch Wrap
Colour	Transparent

Coloured Stretch Film

Coloured Stretch Wrap Film is useful for pallet identification, product segregation, privacy during shipment and organised warehouse storage. It provides the protective benefits of stretch film while helping teams identify loads quickly.

Processing Type	5-Layer Cast Line
Material Type	LLDPE
Thickness Range	18 to 51 Micron
Size Range	75 mm to 1500 mm
Core ID	1 inch / 25 mm and 3 inch / 76 mm
Elongation	200% to 250%
Packaging Type	Box with Stretch Wrap
Coloured / Transparent	Coloured / Transparent

PALLET IDENTIFICATION

COLOUR OPTIONS

Printed Stretch Wrap Film

Printed Stretch Wrap Film supports brand visibility, pallet identification and shipment security. It can be used for company names, product references, handling details or branding elements on wrapped pallets.

Processing Type	5-Layer Cast Line
Material Type	LLDPE
Thickness Range	25 to 51 Micron
Size Range	75 mm to 1500 mm
Core ID	1 inch / 25 mm and 3 inch / 76 mm
Elongation	200% to 250%
Packaging Type	Box with Stretch Wrap
Coloured / Transparent	Transparent
Printing	Custom printing available as per requirement

SHIPMENT SECURITY

PE Cling Film

PE Cling Film is used for food and product wrapping applications where clarity, flexibility and protection are required. It offers good elasticity, puncture resistance and transparency, helping keep fruits, meats, vegetables and salads fresh for longer. Unlike PVC food wrap, PE cling film does not contain plasticizers, stabilizers or carcinogenic additives that may cause health issues.

Specification: As per customer requirement

PE CLING FILM

Air Bubble Film

Air Bubble Film is used for cushioning, surface protection and damage prevention during handling, storage and transit. It is suitable for fragile, delicate, polished and impact-sensitive products.

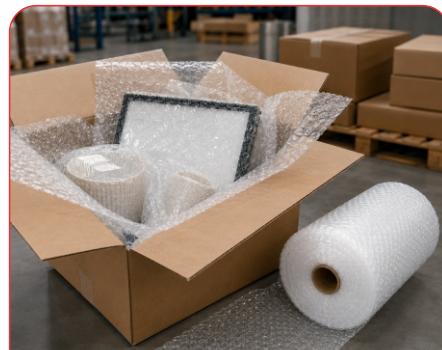

Specification: As per customer requirement

FRAGILE PRODUCT PROTECTION

SURFACE PROTECTION

SAFE STORAGE & TRANSIT

Industries & Applications

Pallet wrapping and load stabilisation

Carton, box and product protection

Warehousing, dispatch and logistics

FMCG, pharma, engineering and manufacturing

Furniture, appliances, pipes, profiles and industrial goods

Export packing and shipment protection
